

JAWLINE SCULPTING CONSENT

KYBELLA® DEOXYCHOLIC ACID

Date: _____

Patient Name: _____

Kybella, a *Deoxycholic Acid* fat dissolver, is used in the correction of moderate to severe 'double chin' submental fat reduction. Kybella is injected and isolated into the fat under the chin and has no effect on excess neck skin.

RESULTS. Please initial in the box:

The results of Kybella can take on average 2 – 4 treatments to achieve the desired result, and is usually a permanent result. There are no guarantees or promises that Kybella will improve the particular concern to be corrected. Kybella follow-up visits are advised and should be scheduled 4 weeks after each treatment.

I acknowledge I have been informed of the Kybella Results and my questions have been answered satisfactorily.

RISKS AND COMPLICATIONS. Please initial in the box:

The injections might feel like a small bug bite. There may be some redness at the injection sites, if so you may apply an ice pack. There may be slight, temporary bruising or mild swelling at the injection sites. There may be numbness or a rash at the injection sites. Slight headaches may occur after a Kybella treatment. Tingling, nodules, itching and skin tightness in the treatment area may occur. Nerve injury in the area of treatment resulting in an uneven smile or facial muscle weakness is rare but may occur. Superficial skin erosions are extremely rare but may occur.

I acknowledge I have been informed of the Kybella Risks and Complications, and my questions have been answered satisfactorily.

CONTRAINDICATIONS. Please initial in the box:

I confirm that I am not pregnant or breastfeeding at this time. I confirm that I am not allergic to *Deoxycholic Acid*, the fat dissolver used. I confirm that I have not used Accutane in the past 6 months. I confirm I have not had cosmetic surgery or plan to have surgery on the neck or chin. I confirm that I do not have any significant neurological disease. I confirm that I am in good health and not under the care of any physician for a medical complication.

I acknowledge I have been informed of the Kybella Contraindications, and my questions have been answered satisfactorily.

PRE & POST-TREATMENT INSTRUCTIONS. Please initial in the box:

I acknowledge I have received the Kybella Pre & Post Treatment Instruction Sheet and confirm that all my questions have been answered satisfactorily.

PAYMENT. Please initial in the box:

Kybella treatments are a cosmetic procedure, not covered under insurance, and I acknowledge that the payment due for the treatment is entirely my responsibility. I understand that Kybella treatment purchases cannot be refunded or returned.

I acknowledge I have been informed of the Kybella Payment Policy, and my questions have been answered satisfactorily.

PHOTOGRAPHS. Please initial in the box:

I hereby authorize pre-treatment, post-treatment and during treatment photographs to be taken of my treatment(s) at River Oaks MedSpa and understand they may be used for purposes of documenting treatments, training purposes, advertising and or marketing. I understand that there will not be compensation for the use of said images now or in the future.

I understand the Photograph Policy.

By signing below, I acknowledge the results, risks and complications, contraindications, post-treatment instructions, payment policy and photography consent of Kybella Treatments now and in the future. I acknowledge that all my questions have been answered to my satisfaction by the medical staff of Dr. Derek C. Lou and River Oaks MedSpa. I hereby give my consent to Kybella Treatments and agree to proceed with the treatments.

KYBELLA® DEOXYCHOLIC ACID

PRE & POST TREATMENT

Kybella®, a *Deoxycholic Acid* fat dissolver, is used in the correction of moderate to severe ‘double chin’ submental fat reduction. Kybella® is injected and isolated into the fat under the chin and has no effect on excess neck skin.

PRE TREATMENT INSTRUCTIONS.

3 DAYS PRIOR TO TREATMENT:

- AVOID the use of Advil, Motrin, Ibuprofen, Aspirin, Excedrin, Aleve, Fish Oils and Vitamin E Supplements (to help prevent bruising)
- AVOID the use of topical products containing Tretinoin, Retin-A, Retinols, Retinoids, Glycolic Acids, Alpha Hydroxy Acid or other “Anti-aging” products.
- AVOID waxing, bleaching, tweezing, or the use of hair removal cream on the area to be treated.
- AVOID excessive alcoholic beverages 24 hours before your treatment to avoid extra bruising

DAY OF TREATMENT:

- Arrive with a clean face (please do not wear makeup). You may apply makeup after your treatment as advised by your Registered Nurse Injector.

POST TREATMENT INSTRUCTIONS.

- No cardio exercise or excessive sweating for 24 hours.
- AVOID the use of Advil, Motrin, Ibuprofen, Aspirin, Excedrin, Aleve, Fish Oils and Vitamin E Supplements for 2-3 days after treatment (Contact your doctor with questions about prescription drugs and the administering of Kybella®).
- If a bruise should occur following the treatment, **apply River Oaks MedSpa’s Arnicare Gel or Crème** daily to hasten the recovery of the bruised area (*available for purchase*).
- Schedule your next treatment visit with a front desk associate to insure that you are pleased with your results.
- Call our facility if you have concerns at any time related to the treatment

RESULTS:

The results of Kybella® can take on average 2 – 4 treatments to achieve the desired result, and is usually a permanent result. There are no guarantees or promises that Kybella will improve the particular concern to be corrected. Kybella® follow-up visits are advised and should be scheduled 4 weeks after each treatment.
